

A M A with CEO & Co-Founder of
UBIX Network & Silent Notary,
Max Breus.

UBIX NETWORK & SILENTNOTARY

January 19th 2022

Q1

WHAT CAN YOU TELL US ABOUT NEW EXCHANGES & LISTINGS?

We cannot disclose information regarding future listings. Regulatory requirements are very strict, and as such, we cannot expose our project to unnecessary risks. In addition to pressure from regulators, we are also limited by Non-Disclosure Agreements (“NDAs”), according to which we are not entitled to talk about listings before official announcements are made by our partners.

Q2

WHAT PROGRESS DID THE TEAM MAKE IN 2021, AND WHERE DO YOU SEE THE PROJECT GOING IN 2022?

We have officially surpassed the stage of a mini 'garage-like start-up'. where our group of technological enthusiasts began to develop revolutionary ideas.

Furthermore, we have passed the point of creating prototypes and testing products / services. Our network is stable, and we already have more than 100,000 blocks in the network. This was just 2021!

Now, we are moving to a new stage - the integrated development of our ecosystem.

Q3

WILL YOU BE RELEASING A NEW UBIX NETWORK WHITEPAPER? IF YES, WHAT IS THE MOST IMPORTANT PART OF THE WHITEPAPER THAT COMMUNITY MEMBERS SHOULD KNOW?

We released a new whitepaper on 1/20/2022. You can download the brand-new UBX Network whitepaper, here: <https://t.co/VEmcZSjmPd>

The most important thing our community should take away from reading the whitepaper is regarding the integrity of our system. What we mean by this is how the individual parts are connected and what their functionalities are.

We tried to explain – not only the technical features of the underlying protocol – but also why we are developing this system and our thought process surrounding how developments will be funded in the distant future. While writing the whitepaper, we felt it was very important for us to convey our vision of how to develop and implement our revolutionary technology (where to start / how we will focus our resources). This is very important for our long-term success!

We welcome, with open arms, all feedback regarding our whitepaper. Please feel free to ask questions and provide feedback in our Telegram group: https://t.me/UBX_Network

Q4 CAN YOU PLEASE PROVIDE DETAIL SURROUNDING ANY UBIX PARTNERSHIPS?

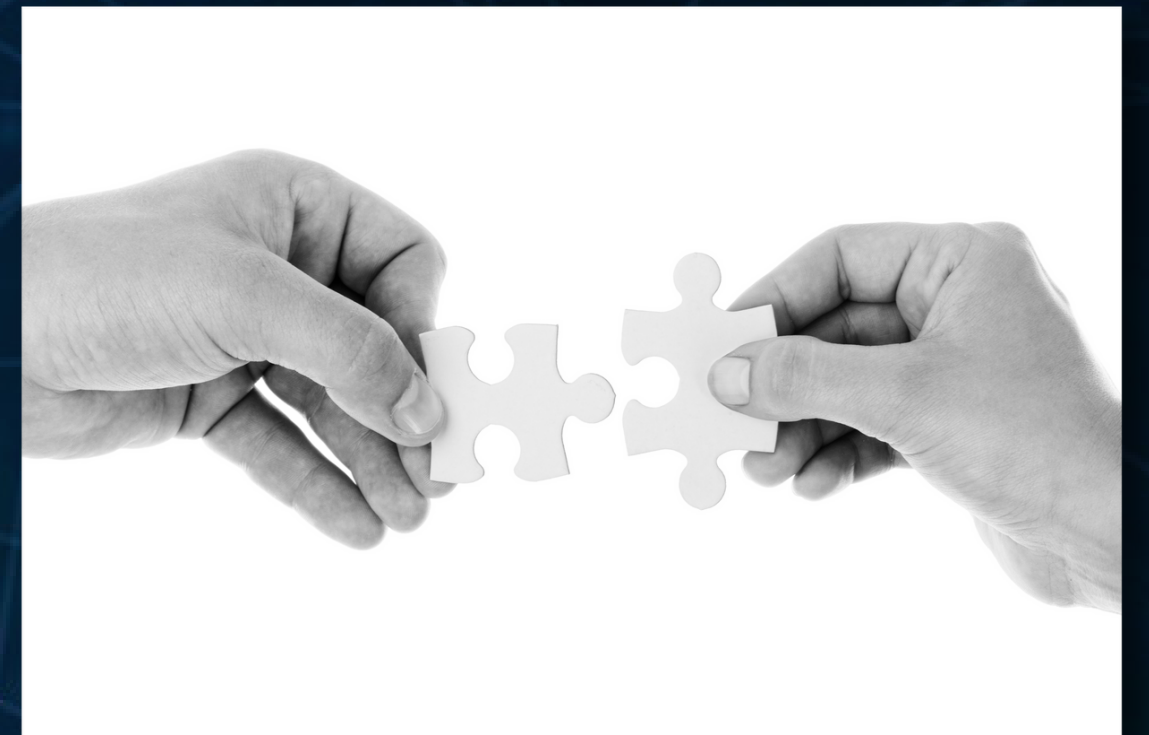

We would like to announce a ground-breaking strategic partnership with Langia – otherwise referred to as the “Metaverse of Language Services.”

Langia – a Canadian-based Translation Platform – is the most advanced certified translation and interpretation platform powered by ai word count for instant quoting and seamless project assignment system. The company works with over 12,000 certified and professional translators and interpreters fluent in 176 languages.

They provide a wide range of services, including document translation, on-site (in-person) interpretation, and remote interpretation! SilentNotary’s blockchain technology will be used to notarize, and thus, help maintain the integrity of Langia’s translated documents! Furthermore, SilentNotary and Langia will seek to develop services / technologies for:

- Verified Credentials;
- SSI and DID technologies; and
- Notarization in the chain to control the integrity, immutability, and originality of digital files.

Q5

DO YOU HAVE OTHER PARTNERSHIPS SIGNED? ARE YOU STILL SEEKING NEW PARTNERSHIPS?

In 2021 alone, we signed several partnerships with companies in varying industries. We are planning to release details surrounding one of these partnerships in the next few weeks!

We are always proactively seeking to partner with companies and hope to sign additional partnerships in 2022!

Q6

WILL YOU BE PROVIDING A NEW ROADMAP IN THE FUTURE?

A new UBIX Network Roadmap was created and released on 1/19/2022, directly after the AMA. You can download the brand-new Roadmap, here: <https://t.co/9mJxkthAMQ>

Q7

CAN YOU OUTLINE SOME DETAILS REGARDING THE TEAM'S PRIORITIES / GOALS FOR 2022?

Some of our current priorities for 2022 – as outlined in the Roadmap – are as follows:

A. Development of the network (the UBIX Network Protocol):

- Introduction of Sharding capabilities.
- Improve the work with smart contracts.
- Make it possible to call smart contracts cross-chain.
- Launch a crowdsourcing process to involve our community on developments.
- Release the first UIPs, determine the prize fund, and include developers in the overall development management system.
- In the future, we will use DAO for decision-making, and this work will be financed by the long term development fund, where 10% of each transaction is deducted.

Q7 (Continued)

B. Development of our Super App – Ubikiri:

- We will redesign wallets and separate them into a UbiPay project. It will be a Web3 wallet.
- We will separate the bridges to Ethereum and Binance Smart Chain into a separate project – The UBIK Depository. It is in the sandbox - this is a Crypto Depository Receipts project.
- We also want to highlight the identification service – UbixID.
- With this all – the general ideology is still preserved – all services are part of the super-application. For example, newly registered SilentNotary users will immediately receive wallets, an account on the exchange, and the opportunity to use all our services. This is a major feature of the super application.

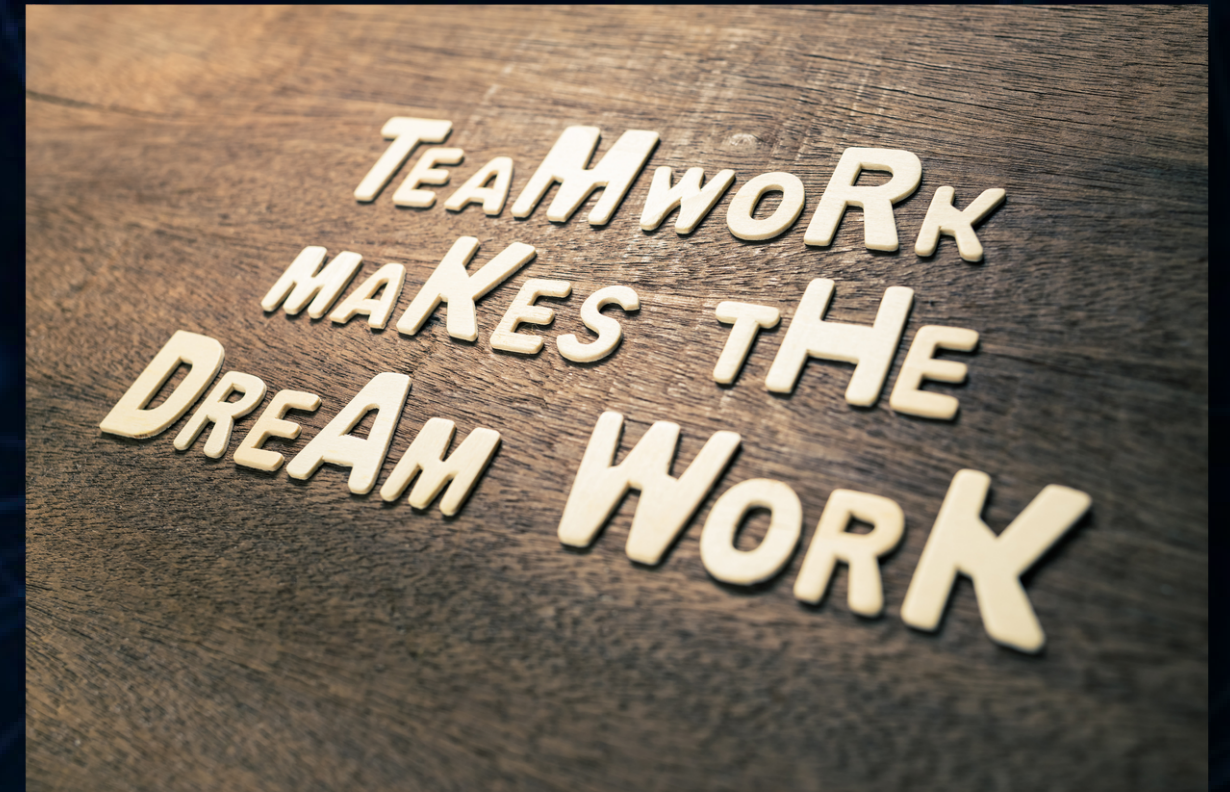

Q7 (Continued)

C. Development of our services:

- SilentNotary (refer to the new Roadmap for further details) – The biggest development that our community will soon see is the implementation of industrial localizations. We will start with creating services for commercial real estate and construction companies. We will also move towards integrating with an online translation platform (Partnership announcement #1 with Langia – see the above partnership questions for more details).
- UBIX Exchange (refer to the new Roadmap for further details) – We intend on releasing brand new user interface for the UBIX Exchange in a matter of weeks. Once the new user interface is released, the exchange will be open for listing all assets!
- We want make mention to the fact that we understand our community has been long awaiting news regarding the UBIX Exchange. We have spent countless days with lawyers, choosing / studying various options for legalization. Furthermore, we made a lot of legal / development progress in 2021: (1) Completed / registered the legal entities necessary for the operation of the exchange, (2) Developed the necessary documentation, and (3) our developers rewrote the engine and redesigned the trading terminal.
- Ubistake – We have had huge success with Ubistake to date. Due to an influx of requests from our community, we are going to be creating mobile applications and adding a support chat function – targeted for completion in Q1 2022.

A Word from Max.

"I would like to take this opportunity to thank everyone who was able to join us for the AMA. This AMA represented a small taste of what's to come. We hope you can join us for an amazing 2022!"

Thank you For Your Support!

The UBIX Network team
